If you're serious about embroidery and multi-decoration, EmbroideryStudio e3 is your answer.

Professional embroidery software for digitizing, printing, printing, ... and so on. My husband and I are big fans of this software. While we have three embroidery rugs, two of which are large, three tables and three cushions, we embroider all over the house. We have an embroidery machine given to us by our

kids around 3 years old and no doubt they still play with it when they are not doing their favorite thing.
