Spellpunk VR is an addictive and innovative blending of spellcasting and virtual reality. You get the chance to wield your physical devices like a magic wand, but you need to do it in VR while working in three-dimension space. You can flip, turn, and hover your hands and arms like a 3D version of the Wii Remote motion controller. This has many creative uses, and is by far one of the coolest things in VR so far. The VR environment was a fresh, vibrant, and perfect addition to what was already an awesome game to begin with. Spellpunk VR is a kind of mesmerizing, uniquely, and vividly designed game to immerse yourself into. Content: Spellpunk VR is a game that is two games in one. First you play a bard in a realistic 3D world. Then you teleport into a virtual reality spellcasting room. There you're able to perform a variety of spells that help you on your quest, like a real life Game of Thrones. The game is not only easily accessible, but also very accessible. The graphics are not the most powerful, but they do fit the mood nicely. Platforms: The game works on all popular Virtual Reality devices, including the Oculus Rift, HTC Vive, and WMR devices. Spellpunk VR is available now on Windows and Mac for \$17.99 on Steam and Humble Bundle. Please read our tips here. If you'd like to talk to our team, we're on Reddit, Discord, or Twitter. Reviews! absolutely love the way the game looks. It's a wholly unique visual style in a world where so many games look alike. Nicholas Sutrich, Windows Central As VR games go, this ones pretty unique. Spellpunk VR gives players the ability to virtually cast spells by actually drawing them out in space. Yes, that sounds a little bit Dr. Strange-y. Jason Micciche, Brutal Gamer If youve ever dreamed about being a spellcaster, this is the game youve been looking for.
